EDUCATION

The University of Washington at Seattle, Seattle, WA (March 2025)

Bachelor of Science - Computer Science, Minor in Business Administration

GPA: 3.82 | Dean's List All Quarters | Allen School Undergraduate Service Award

PROFESSIONAL EXPERIENCE

PMG Worldwide | Dallas, TX | Jun 2025 – Present

AI & Full-Stack Software Engineer I

- Building full-stack features for Alli, PMG's AI-powered marketing intelligence platform, using **React/Redux, TypeScript, MongoDB, and Node.js** to develop a rule-based categorization system and user-facing interface for structuring fragmented campaign data, reducing analyst effort by 15+ hours/week and improving cross-client reporting consistency.
- Led development of "Insights Unwrapped," a marketing insights microsite, owning frontend experience, CI/CD pipelines, and data infrastructure (Snowflake, AWS); delivered in one month with executive visibility and industry press coverage.
- Designed and shipped **AI-driven workflow automations** for Out-of-Home marketing teams across 15+ clients, reducing manual operational effort by 120+ hours/week; authored case studies and led demos for broader company adoption.
- Developed a company-specific AI-driven framework using OpenCode and LLMs to automate code review and end-to-end test generation for engineering teams, improving test coverage by 40% and reducing manual effort by 60%.

Apple | Cupertino, CA | Jun - Sep 2024

Data Engineering & Engineering Program Manager Intern

- Designed a coordination dashboard for Apple Silicon chip validation from scratch, developing Python/SQL ETL pipelines powering Tableau visualizations, gathering requirements across 10+ teams and integrating multiple third party platforms to reduce manual workflows by 70%.
- Drove 85% adoption within 30 days through 20+ stakeholder demos and post-launch training, including senior leadership.

The Washington Post | Washington D.C. | Jun - Aug 2023

Software Engineering Intern

- Developed and shipped a personalized recommendation caching framework in Swift and SQL to preload user customized content for The Post's iOS app, boosting user engagement by 15% and reducing app load times by 30%.
- Independently led a production App Store release and resolved high-priority iOS UI bugs under tight deadlines.

PROJECTS & PUBLICATIONS

Virtual Reality for Parkinson's Disease

Lead Software Engineer, Amplifying Movement & Performance Lab

- Led first-of-its-kind Virtual Reality research initiative to study freezing of gait in Parkinson's Disease, serving as bridge between engineering and rehabilitation teams, translating clinician and industry requirements into engineering design.
- Designed features in Unity and C#, including motion-capture analysis and realistic environments.
- Presented at [three national conferences](#) and first authored publication on VR's role in rehabilitation healthcare.

Unveiling Covert Harms and Social Threats in LLM Generated Conversations

AI Researcher, Social Computing & Algorithmic Experiences Lab

- Developed and applied a social science framework to detect bias in AI-generated cultural hiring conversations, analyzing 1,900+ simulations across multiple LLMs, contributing to award-nominated publication presented at EMNLP and recognized by several academic outlets including [MIT Technology Review](#).

COMMUNITY INVOLVEMENT

University President of Community Outreach, Society of Women Engineers: led 30+ officers for large-scale outreach programs serving 300+ K-12 students; Lead Computer Science Outreach Ambassador; University Journalist & Writing Mentor

SKILLS

Programming & Development: Python, JavaScript, TypeScript, Node.js, React, RTKQuery, Redux, MongoDB, SQL, Java, C#

Tools & Frameworks: AWS, Figma, Unity, AI-assisted dev (Cursor, Claude, Codex), Agentic systems, Git, Jira, Snowflake, Tableau, Flask
